Experience

Software Engineer @ TherapyRoute

April 2019 – May 2021 // Cape Town, South Africa (Remote)

- ▶ Engineered and maintained major features of TherapyRoute's customer-facing web app using ES6, Blaze, Meteor, jQuery and CSS/Sass
- ▶ Manually tested web app in various browsers and mobile devices to ensure cross-browser compatibility and responsiveness
- ▶ Proposed and implemented scalable solutions to improve TherapyRoute's performance
- ▶ Interfaced with user experience designers and other developers to ensure thoughtful and coherent user experiences across TherapyRoute

Software Engineer @ JustDo

April 2019 – December 2020 // San Francisco, CA, USA (Remote)

- ▶ Developed and shipped a robust set of services and APIs to power the web application
- ▶ Built and shipped the JustDo plugins using third-party and internal APIs
- ▶ Proposed and implemented scalable solutions to improve performance

Game Developer @ Dark Lighters

February 2015 – December 2017 // Dhaka, Bangladesh

- ▶ Worked with a small team of four programmers to build marketable mobile games, an ambitious startup originating from Dhaka
- ▶ Assisted in development by providing new ideas, analysis and design feasibilities
- ▶ Developed and shipped interactive mobile games using Unity game engine

Education

Bachelor of Computer Science and Engineering

Institute of Science and Technology

May 2013 – August 2018 // Dhaka, Bangladesh

- ▶ **Course Highlights:** Bachelor of Science in Computer Science and Engineering. Minors in Web Development and Web Design.
- ▶ **Extracurricular Activities:** Participated in numerous national interuniversity programming contests including ACM-ICPC Dhaka Regional 2013, 2014 and 2017

Projects

Notes

Note-taking web app that keeps track of user ideas into their notebook built on Meteor and React. It helps users to focus on what matters most and have access to their information when they need it.

Forkify

Recipe web app for kitchen hobbyists and beginner cooks. Search through thousands of recipes for cooking instructions and ingredients; save your favorite recipes via local storage.

Srt-Lnk

Link/Url shortener web app that keeps track of links for individual users built on Meteor and React. It provides data security through manual authentication, data validation, publications and subscriptions.

Skills

Programming Languages

C, C++, PHP, Python, JavaScript (ES6), HTML, CSS/Sass, GraphQL

Libraries & Frameworks

jQuery, React, Node.js, Express, Meteor, Gatsby

Database Management Systems

MySQL, PostgreSQL, MongoDB

Tools & Platforms

Git, Gulp, Webpack, Netlify, Heroku, WordPress, Docker, Firebase
